

SUGAR MILL OIL

Sugar Mill Oil are premium grade lubricating oils for sugar mill roll journals and slow speed heavily load bearing. Highly reinforced with oiliness additives and extreme pressure compounds to resist rupture under heavy load to reduce frictional drag and bearing temperatures. They are not washed out by sugar juices or water. Permits increased roll pressure and speeds without overheating, resulting in more cane processed per hour and better juice extraction. They can be used also for sugar mill reduction gear trains, lubricated by slush pan.

Special characteristics of Sugar Mill Oil

The General Characteristics	Sugar Mill Oil		
	No.4	No.6	No.9
Color, ASTM	Black	Black	Black
Viscosity @ 100°C, cSt.	85-100	124-133	185-205
Flash Point (COC), °C	240	240	240
Timken OK Load, Lbs. min.	40	45	50

Packaging: 200L
