

TORQUE FLUID

Torque Fluid is multi-purpose hydraulic oil for tractors, used either in transmission, oil-soaked brake, rear gear, or hydraulic systems. It is produced from high-quality base oil and many additives. It is good for withstanding oxidation, including characteristics as follows:

- Prevents wear and scratching of transmission system and rear gear.
- Helps gears run smoothly.
- Excellent resistance against foaming.

Usage of Torque Fluid

- Transmission system, rear gear, and hydraulic system of tractors and many other kinds of agricultural and industrial machinery.

Passed standard tests

- John Deere
- Ford
- Messey-Ferguson (Farm Equipment)
- Allison C-4
- Caterpillar TO-2
- Sperry Vickers I-286-S & M-2950-S
- Denison HF 0, 1, 2
- Cincinnati Milacron P68, P69, P70

Special characteristics of Torque Fluid

The General Characteristics	ISO 68
Density @ 15°C	0.8900
Viscosity @ 40°C, cSt.	66.82
Viscosity @ 100°C, cSt.	8.77
Viscosity Index	104
Flash Point (COC) °C	248
Color, ASTM	L. 1.5
Foaming Test (Seq II, III)	10/0,Trace/0

Packages: 200 litres
